ABOUT

I have a background in web development and experience of successfully designing a websites layout, usability and appearance. In the last few years, I have had the opportunity to work for several web design companies, which has given me extensive web designing knowledge and technical skills.

I have been involved in the creation of many comprehensive websites that incorporated branding, video, dynamic images, ecommerce capabilities and scripting languages. I also possess excellent communication skills and I am comfortable working on projects as part of a team or individually.
